

TRAINING SUPPORT DIRECTORATE

Director
Mr. J. D. Lawless
(760) 830-5919

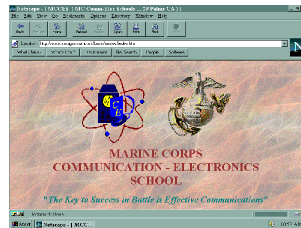

Deputy Director
Major Wm. Cunningham
(760) 830-6455

Operations Chief
MSgt David Youso
(760) 830-6455

DSN: 957-XXXX

Items of interest there are:

- MCCES' history
- Mission and Strategic Vision
- Points of Contract (POCs)
- Course Information
- Academic Schedule (by MOS)
- Links to local & Marine pages

Interactive CourseWare (ICW)

The Marine Corps Modeling & Simulation Management Office (MCMSMO) in Quantico, Virginia is sponsoring the effort to have instructors at formal schools Corps-wide *write and develop* computer-based training ... or since 1992 its preferred term of *Interactive CourseWare (ICW)*.

They have published a Design Guide that is available at their own HomePage at
mcmsmo.usmc.mil/hoyt/index.htm

There are a number of specific MCOs and -- at least at MCCES -- School Orders also that govern procedures that must be followed.

Marine Corps Combat Development Command (MCCDC) has recently issued messages concerning hardware (1713157 Mar 97) and software (310925Z Mar 97) minimum and recommended standards. Some are stated absolutes that require formal waiver if one believes variance is desirable.

MultiMedia Support

TSS' **CD-ROM** machine has been in frequent use. In addition to local courseware, presentations and example formats as *graduate handouts* -- with express written permission of the developers, we have produced copies of government-owned unclassified materials. These are *gold* discs ... and their intent is for **PreMASTERing** the data; ensuring all portions are workable prior to contracting for commercial-type *silver* discs. The information we place on them is of such a volatile/changing nature that mass production hasn't (yet) proved cost effective.

This section has (on temporary loan) a **large-format** black & white/ greyscale **scanner**. It accepts up to 40 inch-wide media with a scan area of 36 inches. This will be invaluable when including schematics in courseware and instructional presentations.

TECHNOLOGY SUPPORT SECTION (TSS)

Programming Officer
Ms. Charlene J. Trnka
(760) 830-5450

Applications Programming
ICW Programming
(760) 830-6433

MultiMedia/Graphics
